

How to support children during their vaccination

Technical procedure appropriate for children:

Short needle 25G 16mm (or 25 mm).
Every drop counts! No aspiration.

Welcome each child individually

Who is this child? Their lucky charm may provide a clue.
Focus on preferences & a positive outcome.

Clarify what support is required

Smaller need: Let's go! (Green poster)
Higher need: Use the tools in the vaccination kit.

Child-friendly information about the process

Provide a calm environment.
The child should feel safe and protected.

Offer comfort positions

Include the parents. (Blue poster)
Let the child choose as much as possible for themselves.

Take the lead during the vaccination

Reassure both child and parents.
Vaccinate rapidly and safely.

Congratulate the child

A positive experience will help with the 2nd vaccination.
Farewell with a smile.
